- 8.1 Ventilation: No particular ventilation requirements.
 8.2 Protection of hands: The glove material has to be impermeable and resistant to the product/the substance/the preparation.
 Due to missing tests no recommendation to the glove material can be given for the product/the preparation/the chemical mixture
 Material of gloves: The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application
 Penetration time of glove material: The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
 8.3 Eye protection: Eye protection is recommended.
 8.4 Protective clothing: Protective clothing is not necessary.
 8.5 General protective and hygienic measures: The usual precautionary measures are to be adhered to when handling biological material.
