**8. EXPOSURE CONTROLS, PERSONAL PROTECTION**

---

- |     |   |   |
|-----|---|---|
| 8.1 | General protective and hygienic measures: | The usual precautionary measures are to be adhered to when handling biological material.  |
| 8.2 | Eye protection:                           | Eye protection is recommended.  |
| 8.3 | Protection of hands:                      | The glove material has to be impermeable and resistant to the product/the substance/the preparation.  |
|     | Material of gloves:                       | Due to missing tests no recommendation to the glove material can be given for the product/the preparation/the chemical mixture  |
|     | Penetration time of glove material:       | The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application |
|     |   | The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.  |
| 8.4 | Ventilation:                              | No particular ventilation requirements.   |
| 8.5 | Protective clothing:                      | Protective clothing is not necessary.   |
