SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
TECHNOZYM® PAI-1 Actibind® ELISA Kit (96 T.) REF TC16075

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified use: For in vitro diagnostic use

1.3. Details of the supplier of the safety data sheet
Technoclone Herstellung von Diagnostika und Arzneimitteln Gesellschaft mbH
Brunner Str. 67
1230 Wien
Österreich
Tel. +43 1 86373-0
Fax +43 1 86373-44
Email (competent person): products@technoclone.com

1.4. Emergency telephone number: +43 1 86373-10 (8:00 – 16:00)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification refers only to the stop solution!
Skin irritant Cat. 2
Eye irritant Cat. 2

2.2. Label elements
Hazard Symbol*: !
Signal word: Warning
Hazard statement: H315 causes skin irritation
H319 causes serious eye irritation
Precautionary statement: P264 wash hands thoroughly after handling

* NOTE: Due to logistic reasons individual lots of the product may carry an old version of the label including one of these hazard symbols: ☻ or ☠
This is valid for a transition period and does not imply assignment to a greater hazard category!

2.3. Other hazards
All chemicals are potentially dangerous. They are therefore only to be handled by specially trained personnel with the necessary care.

Components of product (see 3.2.) contain human plasma that tested non-reactive for HIV antibody, HBsAG and Anti-HCV. These products, as with all human based specimens, should be regarded as potentially infectious and handled with proper laboratory safety procedures for handling of biological material.
### SECTION 3: Composition/Information on ingredients

#### 3.2. Mixtures

**Description of the mixtures**

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

**General**

Remove contaminated clothes

**Contact with eyes**

Wash immediately with plenty of water or normal saline for at least 15 minutes. Keep eye lid open with the finger. See medical advice if irritation persists.

**Contact with skin**

Wash immediately affected area with soap or mild detergent and plenty of water until removal of the mixture. See medical advice if irritation persists.

**Ingestion**

If swallowed rinse mouth with plenty of water provided person is conscious. Do not induce vomiting. Get medical advice if adverse symptoms appear.

#### 4.2. Most important symptoms and effects, both acute and delayed

Toxic symptoms and effects are not known.

#### 4.3. Indication of any immediate medical attention and special treatment needed

No further information available.
SECTION 5: Firefighting measures

5.1. Extinguishing media
   suitable extinguishing media: water spray or regular foam, CO₂, dry powder
   unsuitable extinguishing media: not known

5.2 Special hazards arising from the substance or mixture
   No data available

5.3. Advice for fire fighters
   Protective actions:
   Water jets can be used successfully to cool containers exposed to the fire and disperse fumes.
   Equipment for self-protection:
   Breathing apparatus (SCBA), flame and chemical resistant clothing (boots, gloves, overalls, eye and face protection). Equipment must be conformed to the national/international standards and used in highest condition of protection on the basis of the information reported in the previous sub-sections.

SECTION 6: Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures
   Wear gloves and avoid contact with the substance or mixture

6.2. Environmental precautions
   No special precautions required.

6.3. Methods and material for containment and cleaning up
   Collect spilled material with inert absorbent material and clean with plenty of water
   Discard spilled material according to standard regulations.

6.4. Reference to other sections
   For personal protection see section 8. For disposal consideration see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
   Handle in a well ventilated place, and away from sparkles and flames. Keep the mixture away from drains, surface or ground waters. Wear suitable Personal Protection Equipment (see section 8). Do not eat, drink and smoke in the working areas. Wash hands with soap and water after handling the mixture. Remove contaminated clothing and protective equipment before entering eating areas.

7.2. Conditions for safe storage, including any incompatibilities
   Recommended temperature: store at 2 to 8°C
   Avoid light exposure and keep away from heat sources. Work in a well ventilated workplace. Keep containers tightly closed and labelled with the name of the product. Avoid environmental release. Keep away from food and drinks.

7.3. Specific end use(s)
   The product is intended for in-vitro diagnostic use. Read and understand safety notes as given in the package insert. Use the product in accordance with the Good Laboratory Practice (GLP).
SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Workplace exposure limit values are not established.

8.2. Exposure Control

8.2.1. Appropriate engineering controls

Appropriate risk management measures, that must be adopted at the workplace, have to be selected and applied, following the risks assessment carried out by the employer, in connection with his working activity. If the results of this evaluation show that the general and collective prevention measures are not sufficient to reduce the risk, and if you cannot prevent exposure to the mixture by other measures, adequate personal protective equipment must be adopted, complying with relevant technical national/international standards.

8.2.2. Individual protection measures, such as Personal Protective Equipment (PPE)

a) General protective and hygienic measures:

   The usual precautionary measures are to be adhered to when handling chemicals or biological material.

b) Eye/face protection: Use of safety glasses is recommended.

c) Skin protection:

   i) protection of hands

   The glove material has to be impermeable and resistant to the product/the substance/the mixture. Due to missing tests no recommendation on the glove material can be given for the product/the substance/the mixture. Choose glove material with respect to penetration time, permeation rates and degradation. The selection of the suitable gloves does not only depend on the material, but also on further quality features and varies between manufacturers. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Information about the exact penetration time should be received from the manufacturer of the protective gloves and has to be observed.

   ii) other protective measures: not required

d) Respiratory protection: Respiratory protection not required.

e) Thermal hazards: No information available.

f) Environmental exposure controls: Avoid release into the environment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

<table>
<thead>
<tr>
<th>Property</th>
<th>Value</th>

</tr>
<tr>
<td>Density</td>
<td>1</td>
</tr>
<tr>
<td>Solubility</td>
<td>lyophilized products readily soluble in water, liquids readily miscible with water</td>
</tr>
</tbody>
</table>

9.2. Other information

No further information available.

SECTION 10: Stability and Reactivity

10.1. Reactivity

The product is considered not reactive under normal conditions of usage.
10.2. Chemical Stability
The product is stable until the expiry date shown on the package or the label when stored at the temperature indicated.

10.3. Possibility of hazardous reactions
No hazardous reactions foreseen under normal conditions of storage and use.

10.4. Conditions to avoid
Keep out from heat, water, humidity or light.

10.5. Incompatible materials
Oxidizing agents, strong acid agents and strong alkaline agents.

10.6. Hazardous decomposition products
Thermal decomposition or combustion may include toxic and hazardous fumes of (COx, NOx).

SECTION 11: Toxicological information

11.1. Information on toxicological effects
- Acute toxicity: No data available.
- Skin corrosion/irritation: Prolonged and repeated contact may cause skin irritations.
- Serious eye damage/irritation: May cause eye irritation
- Skin and respiratory sensitization: May cause respiratory irritation
- Germ cell mutagenicity: No data available.
- Carcinogenesis: No data available.
- Reproductive toxicity: No data available.
- Specific target organ toxicity (STOT)-single exposure: No data available.
- Specific target organ toxicity (STOT)-repeated exposure: No data available.
- Aspiration hazards: No data available.

Reasons for the lack of classification:
Where a mixture resulted in a non-classification, this may be due to the availability of data which does not impose a classification for that specific end-point, or due to lack of data or due to availability of inconclusive data or data which are not sufficient to get a classification as for the criteria adopted in regulations mentioned in this data sheet.

SECTION 12: Ecological information

12.1. Toxicity No data available
12.2. Persistency and degradability No data available
12.3. Bioaccumulation potential No data available
12.4. Mobility in soil No data available
12.5. Results of PBT and vPvB assessment not applicable
12.6. Other toxic effects No data available
SECTION 13: Disposal considerations

National laws on disposal must be considered, local and EU requirements for waste recycling must be respected.

13.1 Waste treatment methods

Used waste product, surplus product or spillage products shall be disposed of in accordance with national state and local laws.

SECTION 14: Transport information

The product is not subject to transport regulations according to ADR/RID, IMDG, IATA and DOT.

SECTION 15: Regulatory Information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

The contained information in this MSDS is in accordance with Annex II of regulation no. 1907/2006 (REACH) and in accordance with ANSI “Standard for Hazardous Industrial Chemicals – Material Safety Sheets – Preparation” (ANSI Z400.1-2004) as recommended by US OSHA.

The product/components are not subject to regulation 93/21/EEC about transport and labeling dangerous substances.

15.2. Chemical safety assessment

Chemical safety assessment for this product/mixture is not necessary according to EC 1907/2006 article 14 paragraph 2.

SECTION 16: Other information

Revisions:
General revision according to regulation (EC) 2015/830
Change of document number, integrate former SDB 102 (stop solution)
Update hazard labels

Full text of Hazard Statements referred to under sections 2 and 3

H290 May be corrosive to metals.
H302 Harmful if swallowed
H314 causes severe skin burns and eye damage
H315 causes skin irritation
H317 May cause an allergic skin reaction
H318 Causes serious eye damage
H319 causes serious eye irritation
H410 very toxic to aquatic life with long lasting effects

Abbreviations and Acronyms:

SDS: Safety Data Sheet
PBT: Persistence, Bioaccumulation, Toxicity
vPvB: Very persistent and very bioaccumulative
STOT: specific target organ toxicity
SCBA: Self-contained breathing apparatus
ADR: Agreement concerning the carriage of dangerous goods by road
RID    Regulation concerning the international carriage of dangerous goods by rail
IMDG   International Maritime Dangerous Goods code
IATA   International air transport organization
DOT    US Department of Transportation
ANSI   American National Standards Institute
OSHA   Occupational Safety & Health Administration (US)
HBsAG  Hepatitis Virus B surface antigen
HCV    Hepatitis C Virus
HIV    Human Immunodeficiency Virus
n.a.   Not applicable

All information and instructions provided in this Safety Data Sheet are based on the current state of scientific and technical knowledge at the date indicated on this Safety Data Sheet. Technoclone GmbH shall not be held responsible for any defect in the product covered by this Safety Data Sheet, should the existence of such a defect not be detectable considering the current state of scientific and technical knowledge.

It characterizes the product with regard to the appropriate safety precautions. It does not represent a guarantee of the properties of the product.
